## INDUSTRY NEWS - *News of potential interest to anyone working in the contract industry*

**Rolls-Royce to acquire Siemens' electric aircraft-propulsion business** — Rolls-Royce has agreed to acquire Siemens' eAircraft business in order to accelerate its electrification strategy. With 180 employees, Siemens eAircraft is engaged in the development of electric and hybrid-electric propulsion systems for the aerospace industry. It has locations in Munich and Erlangen, Germany, and Budapest, Hungary. Rolls-Royce and Siemens eAircraft have already worked together on the E-Fan X demonstrator project, which, when flying, will demonstrate hybrid electric propulsion at the scale needed to power regional aircraft. Siemens eAircraft has been cooperating with partners such as Airbus to create prototypes for propulsion systems with power ratings ranging from less than 100 to several thousand kilowatts. Siemens will continue to support the transition to electric aviation with its digital solutions portfolio. As part of the deal, Rolls-Royce will look for opportunities to work with Siemens to support national and international goals of CO2 emission reductions. Rolls-Royce said it has carried out successful ground tests of a hybrid propulsion system that can be utilized across a range of smaller transport platforms, including hybrid-electric vertical take-off and landing vehicles, general aviation aircraft, and hybrid helicopters.

**Canada's Radarsat Constellation Mission launched aboard SpaceX rocket** — Canadian Space Agency's Radarsat Constellation Mission (RCM) was launched into orbit aboard a reused SpaceX Falcon 9 rocket from Vandenberg Air Force Base in California. The first stage, which was previously used in March for a demonstration flight of SpaceX's Crew Dragon capsule, separated a few minutes after launch and set down on a landing zone at the coastal base. About an hour after lift-off, its three RCM Earth-monitoring satellites were deployed a few minutes apart from the upper stage. They will operate in the same orbital plane at an altitude of 600 km, 14,600 km from each other while circling the Earth in 96 minutes. Each satellite has a life expectancy of seven years. The three identical satellites will provide daily images of Canada's territory and maritime approaches, as well as images of the Arctic, four times a day. Equipped with an automatic identification system (AIS), the satellites will also be used for detecting and tracking ships, including those conducting illegal fishing. The satellites will also be used for several other purposes, including tracking sea ice, surface winds, and oil pollution, as well as disaster management, particularly flooding, and monitoring agriculture, forestry, and land changes. The three spacecraft have been assembled in Montreal by prime contractor MDA, a Maxar company. Primary control of the satellites will be from the space agency's headquarters in Saint-Hubert, Quebec.

## Hot Sheet of Available Contractors

### **Subscribers:**

When you're unemployed or if you've received your layoff notice: let the recruiters know you're available with a free Hot Sheet listing. The Hot Sheet includes your job classification, name, contact information, and resume ID. The most effective use of the Hot Sheet is to make sure you have your updated resume as your listing includes a link to your resume. The Hot Sheet consists of two sections: Unemployed Listings and Mini-Ads. You have one free listing per calendar month, if you'd like additional listings during the same calendar month, you can place a Mini-Ad. The cost is \$5 per insertion. Mini-Ads are also for those who are currently employed, but would like to have a listing on the Hot Sheet. Deadline for inclusion on Friday's Hot Sheet is Thursday, 4:00 p.m. (Pacific Coast time).

Want more info on the Hot Sheet – call or email our office, better yet – login and click on the link "Sign up for this week's Hot Sheet!" for more info.

### **Recruiters:**

Are you looking to fill an urgent requirement?? Why not try the Hot Sheet – it's a recruiting tool available to current advertisers. Recruiters can search the last 10 weeks of Hot Sheets to find contractors who are currently available. In addition to the Hot Sheet listing we provide you with a link to the subscriber's resume, along with their contact information. Login to search or view the latest Hot Sheet!!
